Appl. No. 10/728,046 Amdt. dated Dec. 16, 2004 Reply to Office Action of Sept. 22, 2004

## Amendment to the Claims:

- (Currently amended) A shaving apparatus, comprising:
  - a razor cartridge having one or more razor blades;
  - a handle having [[a]] an interior cavity;
- a flexible bladder operable to store shaving aid material, the flexible bladder being disposed within the interior cavity of the handle;
- a housing having an exterior surface, the exterior surface including one or more ports disposed adjacent the razor cartridge, the one or more ports being in fluid communication with the bladder; and

an actuator operable to decrease the volume of the bladder, thereby forcing the shaving aid material from the flexible bladder to the one or more ports[[;]].

- 2. (Original) The shaving apparatus of claim 1 wherein the razor cartridge is mounted on the handle.
- 3. (Original) The shaving apparatus of claim 2, wherein the razor cartridge is removably mounted on the handle.
- 4. (Original) The shaving apparatus of claim 1 wherein the razor cartridge is mounted on the housing.
- 5. (Original) The shaving apparatus of claim 4, wherein the razor cartridge is removably mounted on the housing.
- 6. (Original) The shaving apparatus of claim 1, wherein the one or more ports are adjacent the razor cartridge.
- 7. (Original) The shaving apparatus of claim 1, wherein the housing substantially surrounds the razor cartridge.

Appl. No. 10/728,046 Amdt. dated Dec. 16, 2004 Reply to Office Action of Sept. 22, 2004

- 8. (Original) The shaving apparatus of claim 1, wherein the flowable shaving aid material is disposed within the flexible bladder.
- 9. (Original) The shaving apparatus of claim 8, wherein the flexible bladder is shaped complimentarily to the interior cavity of the handle when substantially filled with flowable shaving aid material.
- 10. (Original) The shaving apparatus of claim 1, wherein the actuator is movable between a first position and a second position.
- 11. (Original) The shaving apparatus of claim 10, further comprising a detent mechanism for selectively securing the actuator.
- 12. (Original) The shaving apparatus of claim 10, wherein in the first position the actuator is located within the interior cavity such that a substantially filled flexible bladder may be disposed within the interior cavity.
- 13. (Original) The shaving apparatus of claim 10, wherein in the second position the actuator is located within the interior cavity at a position that is initially occupied by the substantially filled flexible bladder.
- 14. (Original) The shaving apparatus of claim 10, wherein the handle further includes a biasing mechanism operable to bias the actuator toward the second position.
- 15. (Original) The shaving apparatus of claim 14, wherein the biasing mechanism includes at least one spring.
- 16. (Original) The shaving apparatus of claim 1, wherein the actuator includes a curved contact surface.

Appl. No. 10/728,046 Amdt. dated Dec. 16, 2004 Reply to Office Action of Sept. 22, 2004

- 17. (Original) A shaving apparatus, comprising:
  - a handle having an interior cavity and an actuator;
- a replacement cartridge including a flexible bladder operable to store a flowable shaving aid material, and a housing having an exterior surface including one or more ports, the one or more ports being in fluid communication with the contents of the flexible bladder;

wherein the replacement cartridge is selectively mounted to the handle such that the flexible bladder is at least partially inserted into the interior cavity of the handle; and

wherein the actuator is operable to collapse the bladder, and thereby force shaving aid material from the bladder to the one or more ports.

- 18. (Original) The shaving apparatus of claim 17 further including a razor cartridge mounted adjacent the one or more ports.
- 19. (Original) The shaving apparatus of claim 18, wherein the housing substantially surrounds the razor cartridge.
- 20. (Original) The shaving apparatus of claim 17, wherein the flowable shaving aid material is disposed within the flexible bladder.
- 21. (Original) The shaving apparatus of claim 20, wherein the flexible bladder is shaped complimentarily to the interior cavity of the handle when substantially filled.
- 22. (Original) The shaving apparatus of claim 17, wherein the actuator is movable between a first position and a second position.
- 23. (Original) The shaving apparatus of claim 22, wherein in the first position the actuator is located within the interior cavity such that a substantially filled flexible bladder may be disposed within the interior cavity.

Appl. No. 10/728,046 Amdt, dated Dec. 16, 2004 Reply to Office Action of Sept. 22, 2004

- 24. (Original) The shaving apparatus of claim 22, wherein in the second position the actuator is located within the interior cavity at a position that is initially occupied by the substantially filled flexible bladder.
- 25. (Original) The shaving apparatus of claim 22, wherein the handle further includes a biasing mechanism operable to bias the actuator toward the second position.
- 26. (Original) The shaving apparatus of claim 25, wherein the biasing mechanism includes at least one spring.
- 27. (Original) The shaving apparatus of claim 17, wherein the actuator includes a curved contact surface.
- 28. (Original) A replacement cartridge for a shaving apparatus, comprising:
  a flexible bladder operable to store a flowable shaving aid material; and
  a housing having an exicrior surface, the exterior surface including one or more ports,
  the one or more ports being in fluid communication with the bladder.
- 29. (Currently amended) The replacement cartridge of claim 28 further comprising a razor cartridge having one or more razor blades, the razor cartridge being mounted adjacent the one or more ports[[,]].
- 30. (Original) The replacement cartridge of claim 29, wherein the housing substantially surrounds the razor cartridge.
- 31. (Original) The replacement cartridge of claim 28, wherein the flowable shaving aid material is disposed within the flexible bladder.
